Governor Cooper,

Climate change is real and caused mostly by burning fossil fuels. We must move immediately to wind and solar. If you approve this pipeline, you are condemning the US to 30-40 more years of burning a hydrocarbon that hastens the planet's demise for our children and grandchildren. And this gas is the worst--fracked gas. Fracking is an abomination. You must not approve the pipeline. The promise of jobs and economic benefits are distortions and lies so that industry execs and shareholders can enrich themselves. Call me. I can tell you volumes of science about why this is wrong.
